Chip Removal Conveyor Systems

Automatic chip removal is essential for complete utilization of your high production machine tools. Transcon "Chip-Out" Chip Removal Conveyors outperform and outlast conventional units. Our "Chip-Out" systems are integrally complete and maintain continuous, synchronized chip removing cycles automatically - without manual attention to equipment or handling of chips.

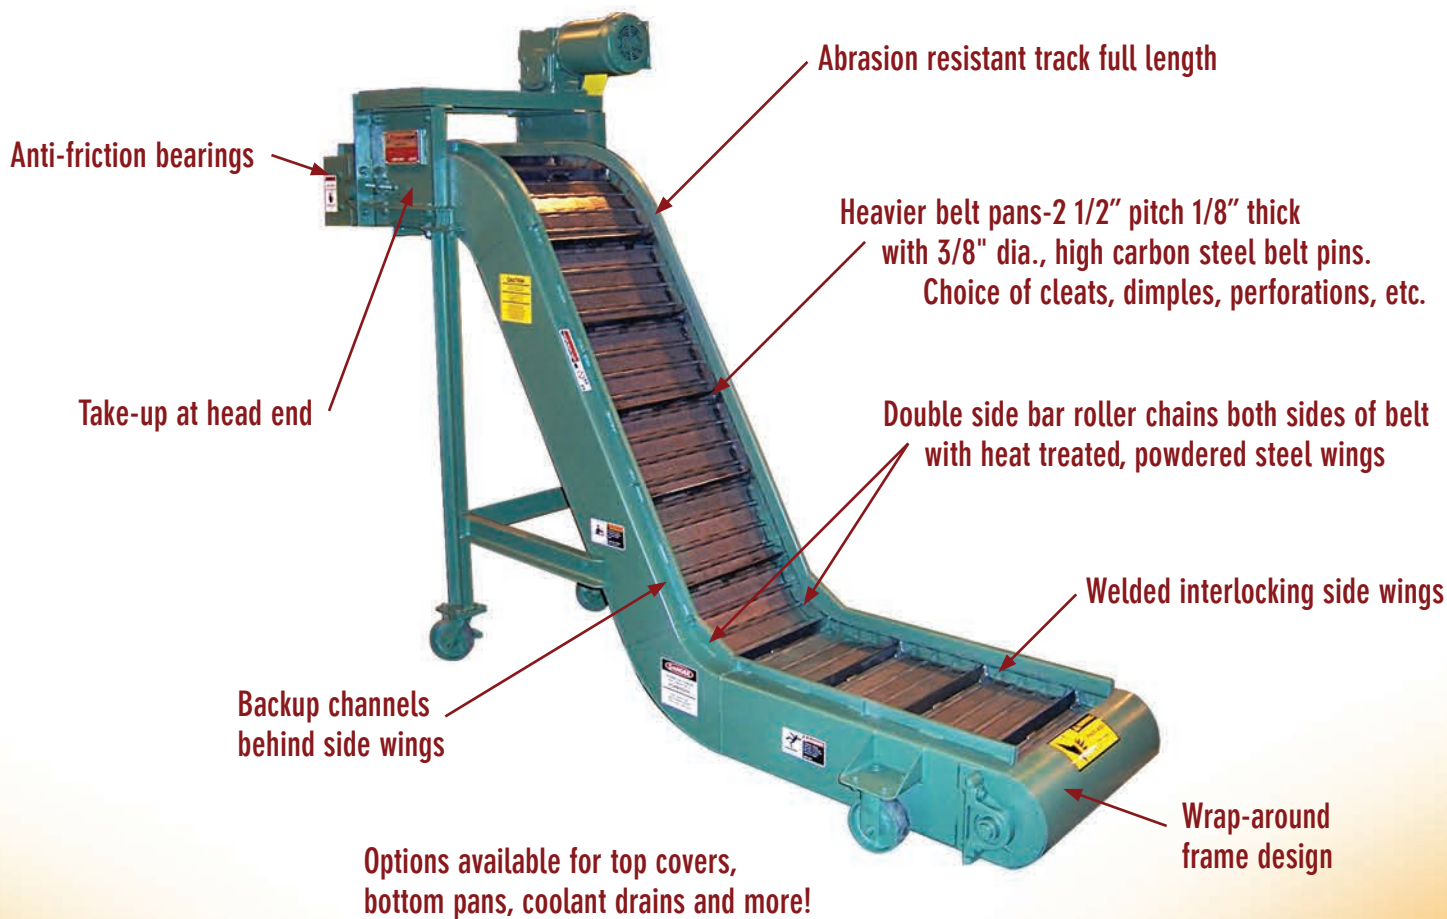

Each conveyor is individually designed to the specifications of your machine tool layout, material and production rate, and handles abrasive, hot and wet chips, scrap turnings, borings and parts. With Transcon's stronger construction, you can rely on a longer working life and heavier-duty performance. Our extra heavy 1/8" steel belt links and rugged frame construction are proven to withstand the daily demands of high volume use and provide extended trouble-free performance.

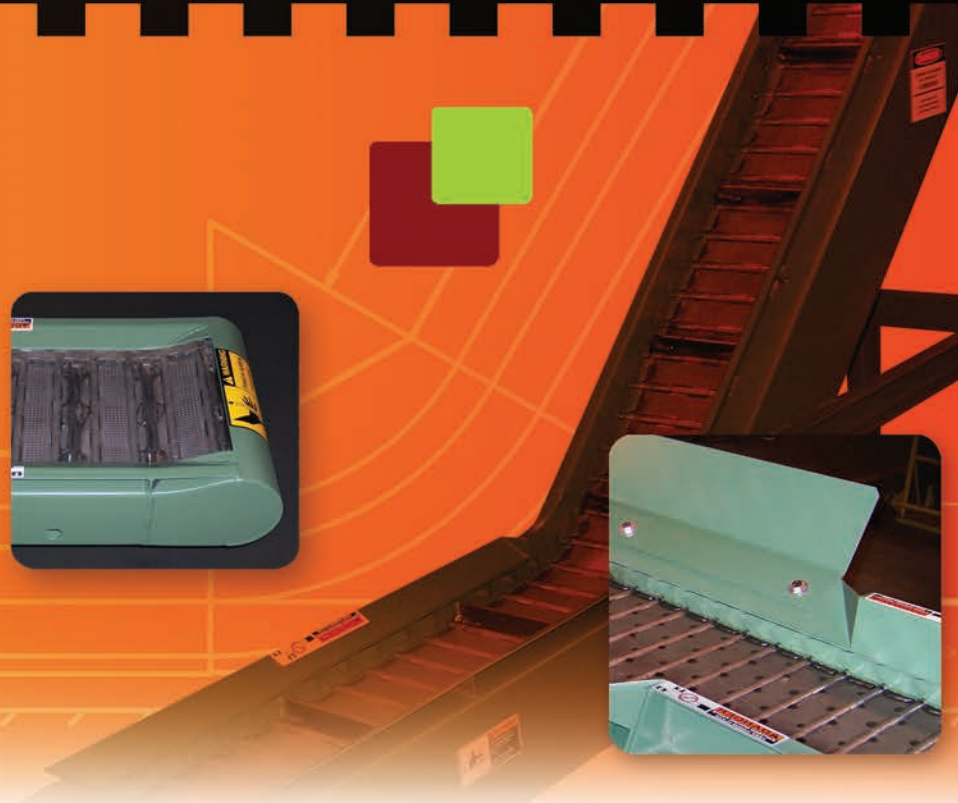

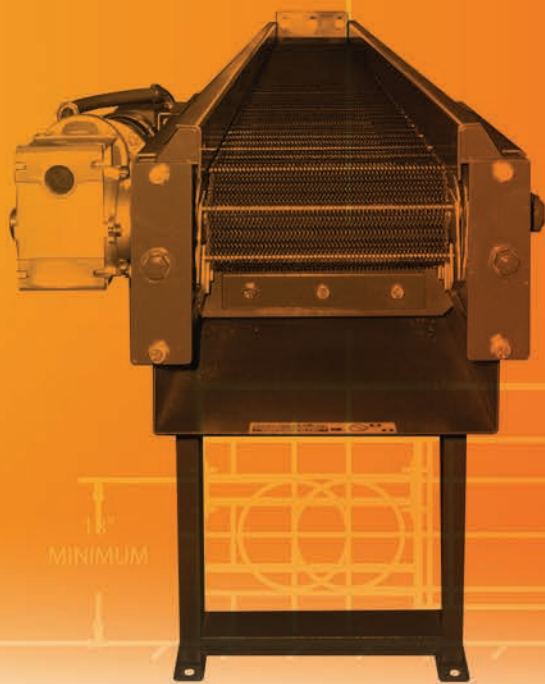

Design and Construction Features

The rugged design of our base “Chip-Out” conveyor is packed with a wide array of heavy-duty features to ensure years of trouble-free use. Each system is individually precision fabricated in our US manufacturing facility and fully tested prior to shipment.

“Chip-Out” System Options

Each “Chip-Out” system is individually designed to the specifications of your machine tool layout. In addition to our long list of standard features, we offer a wide array of options to ensure your conveyor system is perfectly suited to your application and performs with maximum efficiency.

Hinged Steel Belt Types

- Plain
- Dimpled
- Perforated
- Cleated

Discharge Chutes

- Manual
- Automatic
- Motorized
- Bin Level Sensing

Automatic Take-Up Arrangement

- Spring
- Cylinder

1/8” or Heavier Side Skirting

Controls

Covers

Loading Baffles and Hoppers

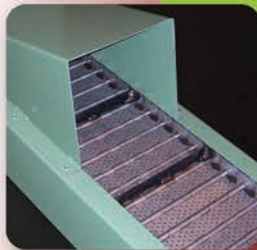

Standard or Low Height Frames

Coolant Drain Pipes or Holes

Adjustable Supports

Stainless Steel Wire Mesh Belting

Special Construction

System Specifications

Since 1959, Transcon has delivered on its promise to design and manufacture only the highest quality, longest lasting conveyor systems available. In fact, some of our first installations are still running today. Our engineers develop systems that fit each customer's unique application.

Transcon "Chip-Outs" can be designed in a wide variety of widths, lengths, inclines, belt paths and options. The diagram below depicts just some of the available options and features of a Transcon "Chip-Out" conveyor. Please consult with your Transcon representative about your specific requirements.

No matter how simple or complex - for expert engineering and manufacture of the highest quality conveyor systems built for your unique application - *Rely on Transcon.*

Transcon - a source you can trust for a wide variety of severe duty material handling solutions

- ✓ Scrap Handling Systems
- ✓ Chips and Turnings Systems
- ✓ Parts Handling Systems and Conveyors
- ✓ Manufacturing Support Conveyors
- ✓ Stamping Plant Automated Processing Systems
- ✓ MSW (Municipal Solid Waste) Conveyors
- ✓ Baler, Shredder, Crusher In-feed Conveyors
- ✓ Magnetic Conveyors
- ✓ Automotive Recycling Conveyors and Systems
